## Profile Summary

I am a passionate learner. I love learning new tools, sharing knowledge about them, and working on them to produce a useful output. I am good at Testing APIs (with 2 years of experience), Python programming and Website building. I have prepared some Readymade sites based on a specific topic that are posted on my Github account.

Have 2 + years of experience in Testing Domain under Banking and Energy Industries. My day-to-day tasks include API Testing with SoapUI, Postman, Checking logs in Jenkins, Kibana, checking pod statuses in Linux. Regularly updating statuses to all stakeholders. Reaching out to Application teams to support Testing in SIT and UAT.

- Driving Daily calls to mitigate issues and conduct On the call testing.
- Contributing in Decision Making in tools that are required to perform specific Testing.
- Actively looking for better ways to do work more effectively and accurately.

## Work Experience

### Test Specialist

IBM

06/2022 - Present

My day-to-day task is to test APIs, perform End to End UI testing. Collaborating with Team to support SIT and UAT Phases, exploring AI with prompts and come up ways to execute extensive testing tasks. Clicking into Logs and Codes, to identify defects and errors.
